What is Touch 'N' Go

Touch 'n Go card is an electronic purse that can be used at all higways in Malaysia, major public transports in Klang Valley, selected parking sites and theme park.

Touch 'n Go uses contactless smartcard technology. The card looks similar to a credit card. User can continue using the card as long as it is pre-loaded with electronic cash. User can reload the card at toll plazas, train stations, Automated Teller Machines, Cash Deposit Machines, Petrol kiosks and at authorised third party outlets. Reload denomination is ranging from RM20 to RM500.

Touch 'n Go enhances the speed of paying for low value but high frequency transactions. Apart from the speed, it is also very convenient because user no longer need to prepare for small change or wait in queue at the cash lane to complete the transaction.
